Healthcare · Collaboration
On-demand services · HRMS
Hospitality · Real estate
Education · IoT

Product Engineer & Mobile Application Developer

2015–PRESENT

I help businesses turn product ideas into **reliable, maintainable solutions** — from understanding the problem to designing, building, integrating, testing, and releasing. Core work is **Flutter and Android** (Riverpod, GoRouter, Dio, Firebase, REST, flavors), with web (React) and API/Laravel support when the product needs it. I use **AI tools** in daily work and keep learning alongside delivery. Also available for **mentoring** and **consultation** on architecture, delivery, and product scope.

EXPERIENCE

Mobile Team Lead / Senior Mobile App Developer
Oct 2020 – Present
OnPoint Software Services Pvt. Ltd.

- Lead Flutter architecture and API-driven delivery for production mobile products.
- Mentor developers, run code reviews, and scope client estimates with clear milestones.
- Ship cross-platform apps with Firebase, REST integrations, flavors, and release readiness.

Mobile Application Developer
Dec 2019 – Sep 2020
Vishwanet Computers Pvt. Ltd.

- Built and shipped cross-platform mobile apps with REST API integration.
- Collaborated with design and backend teams to meet client delivery expectations.

Mobile Developer (Android / iOS)
Sep 2017 – Sep 2019
VizippIndia (Edbrix)

- Engineered education and enterprise apps, including video communication modules.
- Improved performance and stability through testing and optimization.

Android Developer
Nov 2015 – Aug 2017
ClickIt Pvt. Ltd. · Vishwanet Computers

- Native Android development for client business apps using Java / Android SDK.
- Owned shipping, maintenance, and iterative feature delivery.
